Rumble of Carts in the Place is Drowned by the Rear of Cannon.

St. Petersburg, March 5 .- The advance guard of the Japanese left army was within five and a half miles of Mukden station Saturday, according to a telegram from Gen. Kuropatkin, given out today. Other Japanese had captured Suchudzia and Lanschanpa the same day, while their attacks on Putfloff hill and 13 flerce assaults on Kandolesan were repulsed. The commanderin-chief's dispatch, which is dated March , is as follows:

March 1, is as follows:

"Friday night was quiet on the western flank. On Friday a detachment of
our forces on the Mukden-Sinmintin
road met and fought a body of the enemy advancing from the westward. Gun
firing has been audible since morning
in the direction of Suchudzia.

"All is quiet on the center, except in

VERY FEW PEOPLE

Are Free From Some Form of Indigestion.

Very few people are free from some form of indigestion, but scarcely two will have the same symptoms.

Some suffer most directly after eating bloating from gas in stomach and bowels, others have hearthurn or sour risings, still others have palpitation of heart headaches, siecplessness, pains in chest and under shoulder blades, some have extreme nervousness as in nervous dyspepsia.

treme heryousness as in nervous dyspepsia.

But whatever the sympt ms may be the cause in all cases of indigestion is the same, that is the stomach for some reason fails to properly and promptly algest what is eaten.

This is the whole story of stomach troubles in a nutshell. The stomach mushave rest and assistance and Stuart's Dyspepsia Tablets give it both by supplying those natural digestive which every weak stomach lacks, owing to the failure of the peptic glands in the stomach to secrete sufficient acid and pepsin to thoroughly digest and asslimitate the food eaten.

One grain of the active principle in

ach to secrete sufficient acid and pepsin to thoroughly digest and assimilate the food eaten.

One grain of the active principle in Stuart's Dyspepsia Tablets wiil digest 3,000 grains of meat, eggs or other wholesome rood, and this cialm has been proven by actual experiment, which any me can perform for himself in the following mannr: Cut a hard boiled egg into very small pieces, as it would be if masticated; place the egg and two or three of the tablets in a bottle or in containing warm water heated to 38 degrees (the temperature of the body) and keep it at this temperature for three and one-half hours, at the end of which time the egg will be as completely digested as it would have been in the healthy stomach of a hungry boy.

The point of this experiment is that what Stuart's Dyspepsia Tablets will do to the egg or meat in the stomach and nothing else will rest and invigorate the stomach so safely and effectually. Even a little child can take Stuart's Tablets with safety and hencift if its digostion is weak and the thousands of cures accomplished by their regular daily use are easily explained when it is understood that they are composed of vegetable essences, asceptic, pepsin, diastase and Golden Seal, which mingle with the food and digest it thoroughly, giving the overworked stomach a chance to recuperate.

Dieting never cures Dyspepsia, neither and contains which when it is an explicit or which when it is an explicit or which we have the content of the content

overworked stomach a chance to recuperate.
Dieting never cures Dyspepsia, neither do pills and cathartic medicines, which simply irritate and inflame the intestines. When enough food is eaten and promptly digested there will be no constitution, nor in fact will there he disease of any kind because good digestion means good health in every organ.
The merit and success of Stuart's Dyspepsia Tablets are world-wide and they are sold at the moderate price of 50 cents for full sized package in every drug store in the United States and Canada, as well as in Europe.

It is believed now that the operation to the eastward was in part in the nature of a feint, with the design to draw reinforcements thither. If this was the design it was successful, Gen. Kuropatkin having sent the First corps to the assistance of Gen. Linevitch.

As the result of the week's operations the Russian right flank is bent sharply backward instead of paralleling the Shakhe river, and now runs northwest and southeast, passing eight miles from Mukden, covering the Simmintin road.

The "apostolic letter," which had been looked forward to with much interest by the members of the church who had become uneasy through the persistent rumors of financial difficulties, was conciliatory and encouraging in tene.

It has been rumored persistently that Dr. Dowle never will return to Zion City permanently; that his advancing years and ill-health have made it imyears and lil-health have made it im-perative upon him to assume less re-sponsibility and prepare the way for his successor, who in all probability will be his son. Deacon Barnes, now with the party in Mexico, may be placed in charge of Zion City. Dr. Dowie is expected to arrive the second week in April for a visit.

RECIPROCITY

WITH GERMANY.

Kaiser's Government Has Been Making Overtures Looking In That Direction.

OUESTION IS A DELICATE ONE.

Germany Anxious Not to Expose Herself to a Re-usal-United States Will Also Go Slow.

Berlin, March 5,-Relative to the German government's overtures for a reciprocal trade arrangement with the United States, it is stated that there is no disposition here to expose Germany to a refusal nor to place the United States in a position where it would be obliged to refuse provided that the American government regards the time inopportune. Therefore, the German ministry desires to learn informally, privately, as it were, how such a proposal would be treated. That the state department has some idea that the commercial treaty may be discussed indicated by its intention to retain Consul General Mason here for some months, or until it is seen whether a commercial treaty would be considered commercial treaty would be considered, instead of sending him to Paris. The German government has been testing public opinion on the subject by unofficial publications, such as the Comomicial publications, such as the Commercial Treaty association's recent letter advocating a treaty with the United States, arguing that it is one of the natural consequences of Germany's arrangements with other countries. The editorial treatment of the association's letter was generally favorable.

AMERICAN POSITION. Washington, March 5 .- The Berlin advices through the Associated Pres

advices through the Associated Press indicating a purpose on the part of the German foreign office to renew its efforts to secure something in the nature of a reciprocity treaty with the United States have attracted much attention in official circles here as it has been known for some time past that this was in contemplation. In fact this matter has taken shape semi-officially through the presentation to Secv Hay of the presentation to Secy Hay of resolutions adopted by the American board of trade of Berlin favoring such an arrangement. The negotiation by the German government of a set of new trade treaties with Austria, France and Russia, extending to these countries preferential tariff rates on many natural and manufactured products now imported in great quantities from America has made it certain that our trade with Germany would be almost extinguished unless some compensating extinguished unless some compensating arrangement could be made. Emperor William himself has foreseen the growth of much ill-feeling between Germany and the United States as a result and he has specially charged Baron Sternberg to do everything possible to avert this by negotiating a treaty with this government that would place the American producers on all

place the American producers on all fours with those of Europe. The ambassador alheady has cau-tiously broached the subject here, but he is so well acquainted with the state of feeling in the United States senate towards reciprocity that he has not been able to report that the prospect is favorable for the consummation of a German-American reciprocity treaty. The present disposition of the executive is to refrain from entering on further regotiations for trade treaties until the senate has formally indicated its disposition towards the formidable array of reciprocity conventions which have for so many months awaited action by that body and unless the special ses-sion which begins for business purposes tomorrow develops a change of heart on the part of the senators toward these pending treaties there will be no addition to the docket of executive bus-iness in the shape of a German-American reciprocity treaty.

THE TURN OF LIFE

A Time When Women Are Susceptible to Many Dread Diseases-Intelligent Women Prepare for It. Two Relate their Experience.

The "change of life" is the most critical period of a woman's existence and the anxiety felt by women as it draws near is not without reason.

Every woman who neglects the care of her health at this time in-

vites disease and pain. When her system is in a daranged condition, or she is predisposed to apoplexy, or congestion of any organ, the tendency is at this period likely to become active -and with a host of nervous irritations, make life a burden.
